

Standard Oven

Our standard oven is a single storey oven that comes in two sizes and is suitable for your alfresco area. It is an ideal choice for entertaining your family and friends. This oven is a traditional style wood fired oven and can be built into an enclosed area by fluing it through the roof. In winter you get the added bonus of keeping your guests warm. It can be finished/decorated in many different styles according to your taste and like all of our ovens, it's easy to assemble.

The DIY pizza oven kit is easy to install with no experience necessary. All components come with a delivery guarantee, if any parts are damaged during transit, we will replace them at no additional cost to yourself.

Woody™

The Woody wood fired oven™ is a double storey oven, the first of it's kind in the world. This oven can fit four baking trays on top allowing you to roast meat and vegetables, while using the bottom storey at the same time to cook entree's or delicious pizza's. An optional feature for the Woody is the "roisserie", great for cooking meat on the spit. This large oven is ideal for all occasions including, commercial use, functions or gatherings. It looks impressive and will be the talk of your party!
